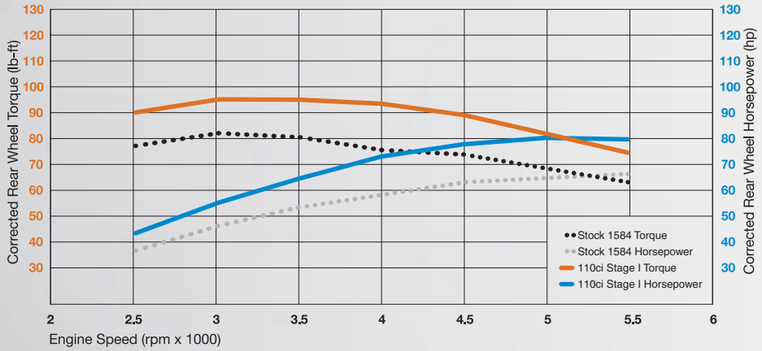
A ONE-TRACK MIND. FOR OFF-THE-LINE PERFORMANCE, IT'S WHAT'S ON THE INSIDE THAT COUNTS. STREET-LEGAL SCREAMIN' EAGLE PERFORMANCE PARTS DELIVER THE AGGRESSIVE PERFORMANCE AND SOUND YOU EXPECT FROM A HARLEY-DAVIDSON® MOTORCYCLE. FACTORY-TESTED SCREAMIN' EAGLE STREET-LEGAL PERFORMANCE CONFIGURATIONS ARE ENGINEERED TO BALANCE THE DEMAND FOR PERFORMANCE, RELIABILITY AND RESPONSIBILITY.

THE DYNO CHART

An invaluable tool in performance modification, the dyno chart can visually compare the performance characteristics of a stock engine with those of a modified engine—and can help you determine if a particular set-up will generate the power gains you're after. The horizontal axis indicates engine speed in RPM and the left and right vertical axis shows the amount of torque and horsepower produced. Comparing the stock and modified torque and horsepower curves can tell you how a configuration performs in a specific RPM range.



HORSEPOWER AND TORQUE

While many judge a motorcycle's performance solely in terms of horsepower, torque is an equally important factor in the equation. In a nutshell, torque is the twisting force that gets your bike moving, while horsepower is the effort required to keep it moving—meaning that torque influences acceleration, while horsepower determines velocity. Your goal should be to reach the balance between horsepower and torque that most closely matches the performance you need.

WARRANTY AND CAUTION

OVERVIEW Harley-Davidson® has the engineering expertise, the sophisticated dyno lab and complete testing facilities to provide enthusiasts with a line of performance products designed to produce good, solid, reliable horsepower and torque. Engine related performance parts are intended for the experienced rider only.

WARRANTY Installation of Screamin' Eagle® products, and similar off-road or competition products from other manufacturers, except some street-legal offerings installed by authorized Harley® dealers, may void your H-D limited vehicle warranty. Installation of a California performance kit on a 49-state model motorcycle, or a 49-state performance kit onto a California model motorcycle will void manufacturers warranty, as it will not result in a street-legal configuration.

SCREAMIN' EAGLE® RACING UPDATE

NHRA® The Screamin' Eagle/Vance & Hines Racing Team is on a mission. In 2007, Andrew Hines tallied a career-best five wins in seven final round appearances while setting his fastest elapsed time of 6.910 seconds. In his first year on the factory squad, teammate Eddie Krawiec became the first rider ever to run a shattering 6.99-second pass at Pomona. In 2008, Andrew and Eddie will team up once again to make a run at the title on their V-Rod® motorcycles. Follow the Countdown to the Championship at NHRA.com.

AMA® With AMA Flat Track Twins Championships in 2006 and 2007, Kenny Coolbeth becomes one of only 10 riders in AMA history to win back-to-back titles. Coolbeth wrapped up the 2007 season with 6 wins and 3 second-place finishes. Wrecking Crew member Jared Mees finished behind Coolbeth in the #2 spot for the second year in a row. Riders Bryan Smith, finished in the #3 spot in 2007, and Joe Kopp round out the Wrecking Crew, with strong results in 2007 and high ambitions for the 2008 season.

AHDRA® If you ever wondered what it would feel like to tear down the track, the time to make that dream a reality is now. AHDRA competition provides all enthusiasts the opportunity to experience the high-octane adrenaline of drag racing. With your street bike or race-prepped machine, there are five Screamin' Eagle classes—including the VRXSE Destroyer™ class—to put you out on the track and in the zone. STAGE I AIR CLEANER

Let It Breathe The first step to unleashing the power of a V-Twin motor is to let it breathe. The engine is an air pump, so the more air and fuel it can swallow, burn and exhale, the more power it produces. Adding a Stage I High Flow or Heavy Breather Air Cleaner and Street Performance Muffler combination produces a lot of "bang for the buck", and is a great place to start your performance build.

STAGE I BIG BORE

Open It Up Getting inside the engine and adding big bore cylinders and matching pistons is the fastest way to increase your bike's pulling power. When the torque curve peaks early and continues to pull all the way through the mid-range, you feel it. Big bore engines provide the power required to pass a slow moving camper or to pull a loaded bike up a long grade. Want even more? Step up to the Big Bore Stage II Kit and you add performance-matched cams for measurable increases in torque and horsepower.

ACR gives you peace of mind and protects your investment. ACR can be installed on stock or Screamin' Eagle Performance cylinder heads for all '07-later Twin Cam equipped models. Installation requires matching to be performed by a competent machinist using the Screamin' Eagle Automatic Compression Release Fixture Kit. P/N 94648-08 *(sold separately)*. A. SCREAMIN' EAGLE® 6-SPEED TRANSMISSION AND GEAR SET

Designed from the ground up, the Screamin' Eagle transmission incorporates many of the best Original Equipment features, like late-style shifting mechanism and a newly designed "shift ring" system to make this the smoothest shifting Harley-Davidson® transmission available. The "shift ring" system is similar to the system used in the VRSC transmission, and it slides on the shafts to mate into the gears. This eliminates sliding heavy gears to accomplish the shift, and results in smooth, precise and light effort shifting. Sixth gear is a true overdrive, at a .89:1 ratio, and the first five gears mimic today's proven 5-speed ratios. The overdrive feature allows you to run a lower engine RPM in sixth gear, at any given road speed. Lower RPM can result in lower vibration, longer engine life and smoother cruising. The Screamin' Eagle 6-Speed Transmission is available as a complete transmission, or as a replacement gear set, and can be matched with Hydraulic or Cable-operated clutch controls.

Screamin' Eagle 6-Speed Transmissions feature forged chrome "trap door", forged shifter forks and forged and precisely ground gears. No speedometer or exhaust mount modifications are required. Complete transmissions are ready to install into the chassis, and the 6-Speed Gear Set Kits are designed to replace the stock gear set without removing the transmission. Gear Set Kits require slight modification (template included) to the Original Equipment transmission case, and include all necessary installation hardware.
